Botanical Garden of Bulgarian Academy of Sciences (BAS)

2022: Plant distribution agreement and seeds requested

In response to the International Convention on Biological Diversity (Rio de Janeiro), the Botanical Garden BAS supplies the seeds requested below on the condition that:

1. They are used for the common good in areas of research, education, conservation and the development of public botanic gardens.

2. If the recipient seeks to commercialise the genetic material, its products or research derived from it, then written permission must be obtined from Botanical Garden BAS. Such commercialisation will be subject to the conditions of a separate agreement.

3. The genetic material, its products or resources deriving from it should not be passed onto a third party without written permission from Botanical Garden BAS.

4. Research publications resulting from the use of this material should acknowledge Botanical Garden BAS as its supplier. In addition, these publications are expected to be sent to the garden automatically, without request.
